

Nutgrass management on-farm discussion

National Vegetable Extension Network

VICTORIA - NORTHERN,
WESTERN & SOUTH EASTERN

Are you interested in the different management options available for controlling nutgrass? Nutgrass can be a serious problem in vegetable production and easily impact the viability of your growing operation.

Attend this 2-hour workshop to hear from some of Australia's leading experts on nutgrass and help determine the best management options for your farm.

Speakers will include:

- **Dr Paul Kristiansen, University of New England** - an integrated approach to nutgrass management
- **David Hughes, Nufarm** - chemical control for nutgrass management
- **Camilla Humphries, E.E. Muir & Sons** - update on nutgrass management trial work and future direction
