Workplace Health & Safety

Workplace Health and Safety (WHS) has been identified as a concern for vegetable growers.

RMCG has been leading a project for **Horticulture Innovation Australia (HIA)**, which aims to address the WHS concerns of vegetable growers and help make the vegetable farm and packing sheds safer.

VegWHS has been developed following discussions with vegetable growers, to help you deal with WHS issues on your farm.

The **VegWHS** resource is suitable for businesses of all sizes. Large vegetable businesses can pick and choose from the components of **VegWHS** to enhance their existing system.

Small and medium sized businesses that don't have a formal WHS program, can easily use **VegWHS** to build WHS into their business.

This project has been funded by HIA using the National Vegetable Levy and matched funds from the Australian Government.

Horticulture Innovation Australia

VegWHS

VegWHS:

- Designed specifically for the vegetable industry using 'real world' experience from successful horticulture businesses
- The tools you need to ensure that common daily tasks are conducted safely
- Customisable policy, forms and checklists
- Safety procedures for common farm tasks in multiple languages
- Simple, clear and easy to use
- Absolutely FREE! (We can also provide assistance with implementing the program on your farm!)
