

Victorian Vegetable Grower

# Notes

20-December 2010

## Energy Cost Savings for VGA Members

### Are you paying too much for electricity ?

The Vegetable Growers' Association of Victoria, in partnership with **Commercial Energy Brokers Australia - CEBA**, are working to assist growers reduce the cost of their electricity supply.

Energy deregulation enables you to select your power supplier. There are many power suppliers to choose from, all with different supply contracts on offer.

Deregulation has opened up significant cost reduction opportunities, which are **not** being fully exploited by "everyday" energy retailers or brokers.

**CEBA** is an experienced and well established national energy brokerage business that can help reduce your energy costs through tariff restructuring.

The VGA encourage all Members to speak with **CEBA** about a **FREE energy audit** to make sure you are not paying too much for your electricity.

**CEBA** already partner a number of successful national businesses including: *Subway, Noodle Box, the Furnishing Industry of Australia* and the *Australian Newsagents' Federation*.

Three Victorian vegetable businesses have already spoken with **CEBA** and now enjoy a significant reduction in their energy bill:

**Arnotts Vegetable Farms** - Clyde

**Coolibah Herbs** - Pearcedale

**Lamattina Vegetable Growers** - Cranbourne

With the cost of energy going up all the time, any reduction in your power costs will be a most welcomed change.
